EDUCATION

Southern Alberta Institute of Technology

Information Technology: Software Development Diploma

University of Calgary

Bachelor of Computer Science

September 2020 – May 2022

GPA: 3.84/ 4.0

September 2024 – Ongoing

WORK EXPERIENCE

New Idea Machine: *Full Stack Developer*

May 2022 – February 2025

- Took on the responsibility of a variety of software development projects with different companies and collaborates, delivering on key requirements
- Demonstrated the ability to be self-motivated/driven in a remote environment
- Worked under a project manager and dev team to complete Agile deliverables
- Most notably worked with React to create an in-house project management tool for clients

VOLUNTEER EXPERIENCE

Computer Science Undergraduate Society (UofC): *VP of Tech*

June 2025 – Ongoing

- Main developer for the CSUS club website. Built on React utilizing Cloudflare as a host
- Responsible for running CalgaryHacks and meeting with the university board to discuss future operations and events amongst our team

OTHER EXPERIENCE

SAIT Capstone Project: *Full-Stack Developer*

September 2021 – April 2022

- Worked in collaboration with five other students to create an eCommerce React website for an independent client with the primary goal of ease of use with no prior tech knowledge
- Implemented attacker protection using Spring Security, OAuth2, and JSON Web Tokens. Featuring industry standard login/account procedures, protecting user data
- Utilized SQL, JavaScript, and React to allow the client to populate their webstore on-site
- Designed REST API calls using React to streamline data querying between client and server

Tech Start: Event Ease: *Backend Developer*

November 2024 – May 2025

- Worked with Typescript on a React and React Native app that helps event organizers
- Utilized MongoDB to query the data optimally and provide a seamless app experience
- Leveraged Clerk to deploy effective user authentication and user profiles within the service

Hackathons

- Participated in four Hackathons, most notably CalgaryHacks 2025, where I lead my team to 2nd place in division two building Leaf Quest, a react web-game centered around promoting environmentalism

Competitive Programming Contests

- Placed 5th in division one for Calgary Collegiate Programming Contest (CCPC) 2025

SKILLS

Languages: Native English speaker.

Technical Skills: Java, Junit, Python, C#, CSS, JavaScript, TypeScript, React, React Native, Web Security, SQL/PLSQL, MongoDB, Unity Engine, .NET, and Linux.
